

Medicine Compliance Aids

Supporting you to remain independent and take your medicines

Are you aware there are several options available to support you with taking your medication?

A dossett box is not necessarily the best option for you!

The community pharmacist will help you find the best option.

We want everyone to get the full benefit from their medication.

A pharmacist is qualified to help ensure you are able to take your medication as required.

If you do not take your medicines as prescribed this will have an impact on your health.

If you are struggling there are options to help.

Please note some support options may incur a charge.
